The following Notes are sent out in conjunction with the Entry Form. The notes clear up a few problems that caused drama at the last Champs.

In the competitor's official statement of agreement which each competitor signs there is reference to local rules and requirements laid down by SAM1788. The following points are added under that clause to try and stop a repeat of last year's on field drama.

- * All People attending and competing at the 2022 SAM 1788 Championships MUST be double vaccinated and have Proof thereof. (government requirement?)*
- * Limited engine run flyoffs: In the event of an over run in the fly off the competitor must land within two minutes. (reason, such competitor could be used as a thermal seeking device by those competing for a trophy.)*
- * Transmitters are not to be taken into the landing area while model is airborne, however once model comes to a complete stop competitor may retrieve his model with his transmitter in his hand. (to clear up misunderstanding from last year)*
- * Glider Winches: All winches to be used in the glider event MUST be set up at least 1 hour before the 1pm start for the glider event. Any winch not set up in the allotted time frame is ineligible for use in the competition. (Reason to speed up the competition and get event underway on time.)*

*Peter (Condo) Smith.
