SAM CHAMPS 2009 RADIO CONTROL RULES

General Rules: All models and flights shall be in accordance with the latest AMA and 2006 SAM rules unless otherwise stated. All pertinent AMA Safety Rules covering the model, modeler and support equipment shall be in effect. All models except scale models must bear the entrants identification tag and AMA number.

Notes:

- 1. Antique Glow/Pure Antique:** An entrant may enter either Antique Glow or Pure Antique, but not both. Please circle which Antique event you intend to fly. If you do not so indicate before flying, your score will not earn championship points.
- 2. Ohlsson Sideport Events:** A rules deviation for the Ohlsson Sideport Event was approved by the SAM Board of Directors. All engines (large or small port) will be allowed a 45 second engine run. Note that the sideport event allows all O&R sideport engine sizes i.e., .19 & .23 as well as the big .60's. This deviation does not affect the separate O&R .23 event. But should you fly an O&R .23 event ship in the sideport event, remember that it must have the 10 OZ./SF wing loading required by the event.
- 3. RC Concours:** Any model entered in the Concours events must make one qualifying official flight, certified by a witness during the Champs.
- 4. Frequency:** Include the channel planned to be flown if flying on 72 mhz. If flying on 2.4 ghz, so note in the column for channel. For those flying on the ham bands, include frequency information and attach a copy of your ham license to the entry form.
- 5. Speed 400** The first flight in the Speed 400 event will be a mass launch. There will be a separate single prize for high time on that first flight. The first flight will also count as the first of three flights in a three flight event for those who choose to make all three flights.
- 6. List of Events for the various Grand Championship Prizes** The events that "count" for purposes of the Glow RC Championship are Antique Glow, A Glow LER, ½ A Texaco, B Glow LER, Texaco Glow and C Glow LER. The events that "count" for the Spark Ignition RC Championship are Pure Antique, C Ignition LER, Texaco Ignition, A Ignition LER, and B Ignition LER. The events that "count" for the Electric Championship are Electric LMR, Electric Texaco, Electric Wakefield, Electric Unlimited and Spirit of SAM.
- 7 Texaco Championship** Texaco Glow and Texaco Ignition are two separate events for this SAM Champs. The Texaco Championship trophy will be awarded for the one highest Texaco time recorded in the two events.
