Speed 400/ 1/2 A Annual Fall Event –Results

BENNY BOXCAR results

Brian Chan	25:48	1st Place
Gary Leopold	20:54	2nd Place
Frank Womack	16:03	3rd Place
John Eaton	15:37	
Ken Martnez	10:10	
Bill Copeland	3:18	

San Jose results

Ken Martinez	22:48	1st Place
Frank Womack	13:20	2nd Place
John Eaton	12:49	

The first place winners of each even made it to the finals and they were,

Gary Leopold flying the **Simplex**

Brian Chan flying the **Benny Boxcar**

Ken Martinez flying the **San Jose**

The final flight was a mass launch. Last man down takes first. The air that day was very good in my opinion. But I wasn't flying. With all three pilots at the ready line they took off to see who would be called The All Up Best.

Gary Leopold with his Simplex got the honors of highest launch. But to no avail the Simplex was no match. He was the first down 3:52 flight time. Now it was between Brian Chan and Ken Martinez. Sorry to say Brian ran out of hot air with his Boxcar and sank back to the soft grass of the field with a time of 5:02 That left Ken Martinez taking TOP Honors of first place with his San Jose. A time of 6:33!

Well done Ken!!!! I still think something was a little fishy about the outcome as they all came together in Brian's van! These are the best as I can remember (welcome to old age, Sarg! bc) them happening sorry if I missed any thing. I would like to thank all who came out to fly and those who came out to help. Pictures to follow.

Proposed Guidelines and Flight Rules for Classes A,B and C Electric LMR

SAM 21 member, **Brian Sargent**, has been gathering flight data and input from various sources in an effort to make participation in at least the 'Electric Limited Motor Run' event more straight forward and understandable for the average modeler, and to provide a more relaxed level of competition for modelers who are more interested in having fun than they are in becoming 'electrical engineers'. The following is his first 'cut'... Your comments are invited at: b.h.sargent@gmail.com or call: **408.656.3662**

Entries shall be an electric powered SAM old timer design having a minimum of **8 oz. per square foot**.

Electric motors may be permanent magnet, brushed, brushless, direct or indirect via gear/belt speed reduction drive. No folding props. Scaling is allowed to a max of 120 inches.

The **three classes** will be:

Class A: minimum wing area of **225** sq. in. to a max of **450** sq. in.

Class B: minimum wing area of **451** sq. in. to a max of **675** sq. in.

Class C: minimum wing area of **676** sq. in. to a max of **1470** sq. in.

The batteries (LiPo) to be used for the 3 classes is a part of this project that is yet TBD.

For now the sizes are:

Class A: 2S1300 mah

Class B: 2S2200 mah (One size battery per class)

Class C: 3S1800 mah

Motor run time is also a TBD but for now it is set **at 45 seconds**.

Maximum Flight times will be:

Class A: 7 min

Class B: 8 min (Same flight time as LER class events)

Class C: 9 min

Models shall ROG. Motor run shall be continuous. Scoring will be best 2 of 4 flights.
