

AeroTech Electronics

For immediate release:-

Marv Stern's AeroTech Electronics is announcing major changes in it's product line. While the ESW-1 Electronic Switch remains in the line, the IGN-SW Ignition Unit has been discontinued.

Replacing it are two new products. The first is the all new Mark II Ignition Unit. This is a standalone unit and does not include the ESW-1. The major feature is the protection afforded the output transistor and ignition coil in the event the engine stops prematurely with the points closed. If this happens, the unit shuts down immediately protecting the unit from possible overload and the ignition coil from burning up. It measures approx. 1-1/8 x 1-1/2 inches.

The second item is the Mark III R/C Ignition System. This integrates the ESW-1 Switch on the same board as the Mark II Ignition Unit. Features of the Mark III include not being able to activate the ignition unless the transmitter and receiver are operating. The unit will also shut off immediately if the receiver loses signal. Again if the engine shuts down prematurely with the points closed, the unit will also shut down. The unit measures approx. 1-1/8 x 2-1/4 inches enabling it to fit in the smallest of fuselages .

The Mark III also provides connections for an external or booster source, allowing the engine to be run without requiring the transmitter and receiver to be turned on. This is a great advantage when the transmitter is impounded at the flying field or at a contest.

All units are encapsulated in a protective plastic shell and can be mounted using Velcro tape.

AeroTech offers a 30-day money-back guarantee plus an unlimited guarantee for any defects. (not including crash damage). Marv manufactures the units and will fix anything he makes, usually within 2 days.

To order, send check or money order made out to Marvin Stern, 7 Abbot Ct., Jackson, NJ 08527. He can be reached at 732-928-0884 or E-mail at ign-sw@optimum.net.

Prices:

ESW-1 Electronic Switch \$25.00

Mark II Ignition Unit \$25.00

Mark III R/C Ignition System \$45.00
